

Investment idea:

«The shares of Cisco Systems Inc. are preparing to resume growth!»

Cisco Systems, Inc. (#CSCO) — is an American multinational company, which develops and sells network equipment. One of The world's largest companies specializing in the field of high technology. Cisco is one of the well-known and respected companies in the computer industry. Cisco Systems, Inc. founded in 1984.

PROS for the purchase of shares Cisco Systems Inc. in June:

- **Recovery of shares in the technical sector of the United States.** The NASDAQ index, which includes Cisco shares, after a month's movement in flat, remains near

significant resistance, the breakthrough of it will open the way to highs of the current year.

A driver for this growth may be the resumption of optimism from the US economy on the publication of economic growth data.

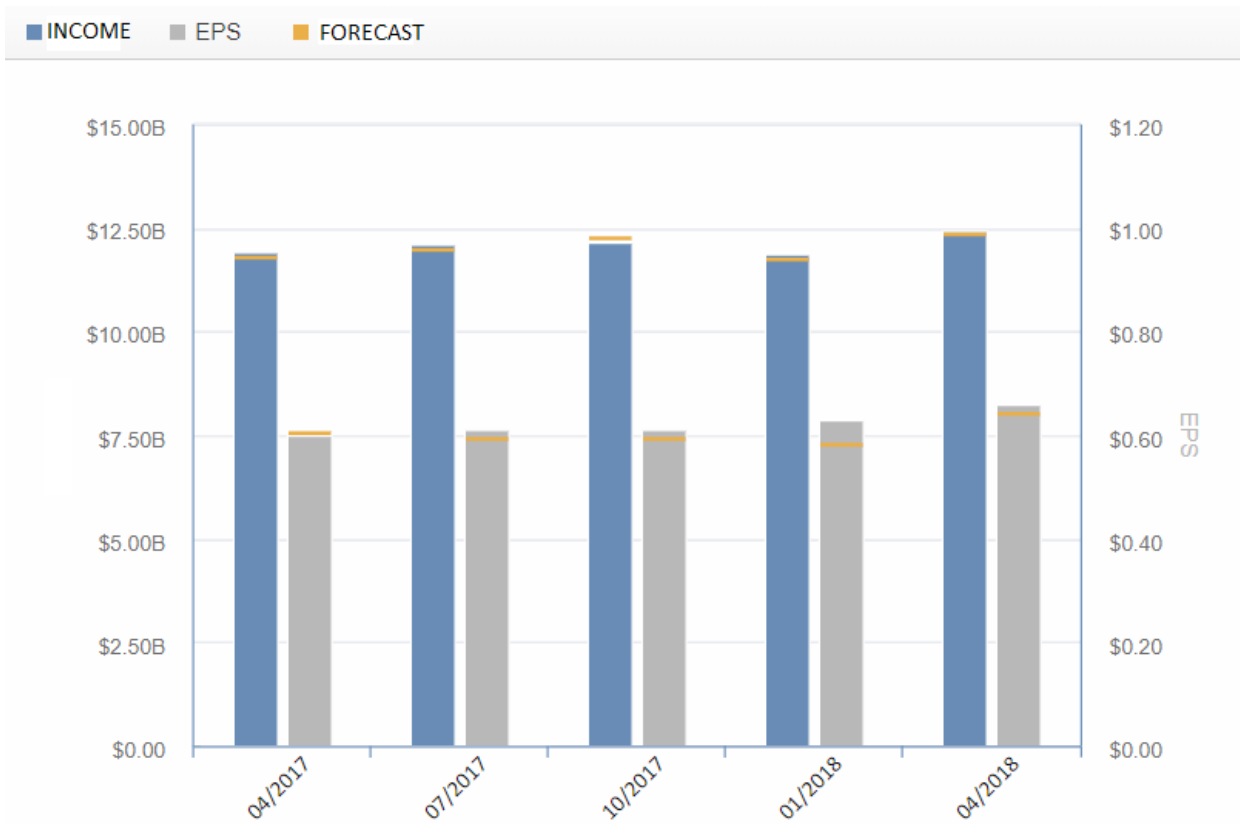

- **Reporting.** The last quarterly reporting in the current year shows the profit and dividend growth of the company, which in February was regarded as a positive signal, but in May - negative one.

At the same time, income forecasts for August remain extremely optimistic. Which will cause the market to adjust after the May decline.

The Forecast: Income – 12,77B, EPS – 0,69.

- **Technical factor.** Cisco Systems, Inc. shares are traded in the upward trend since August of last year, this will limit the decline to the lower boundary of the ascending channel. This channel is also the main support for the resumption of growth.

On the publication of the May report shares Cisco Systems Inc. formed a new gap, which also serves as one of the signals to strengthening of these shares.

Risk Factor:

The main risk factor remains a further decline in high-tech sector due to the possibility of increasing risks associated with negative sentiments.
