The result of the investment idea:

‘‘A holiday is always with Coca-Cola! And now a profit as well!’’

The main issue of the idea is
the purchase of Coca Cola shares.
The recommended start amount is $ 10,000.
Profit - from 100% to 200% of the lot size.
The period of the idea’s work is
from August 30 to October 1 2018.

The investment idea of August ‘‘A holiday is always with Coca-Cola! And now a profit as well!’’ remains relevant in maintaining the uptrend. But it stops receiving maintenance due to the end of the main time for goals achievement. It is recommended to stop opening new positions on these shares in the framework of this investment idea, or to redeploy transactions to breakeven.

Technically, Coca-Cola shares remain in an uptrend and retain the potential to achieve their goals. The limiting factor in the growth of these shares is their overbought and the resumption of negative sentiment on the stock markets that can slow down the development of the investment idea in turn.
