

The results of the investment idea:

**“Following the footsteps of the “dreamer from Wall Street”. What to expect from Elon Mask and TESLA company in the near future?”**

**Idea** — Tesla Stocks Purchase.

**The recommended starting amount** —  
is \$ 10,000.

**Profit** — from \$ 2,000.00 to \$ 3,000.00.

**The period of work of the idea** — February  
5 - March 31, 2018.

The publication of the results of 2017, as expected, undergone correction. As a result, TESLA shares fell to a significant level of \$ 300.00. After that, a correction followed, which was excellent opportunity to enter the deal.

As a result, the investment idea “Following the footsteps of “the Wall Street dreamer.” What to expect from Elon Mask and TESLA in the near future?” has justified itself, partially having brought profit in 15% or \$ 1500. And justified expectations on this investment idea.

Because of the growing negative sentiment on the stock exchanges and the general flight of investors from risks due to fundamental circumstances on world financial market, the investment idea was not justified in the full scale. As a result, this investment idea was not continued, despite the persisting potential.
