

The results of the investment idea:

"IBM shares will continue to decline. Get ready to make money"

The main issue is to buy the IBM shares.

The recommended start amount is \$ 10,000.

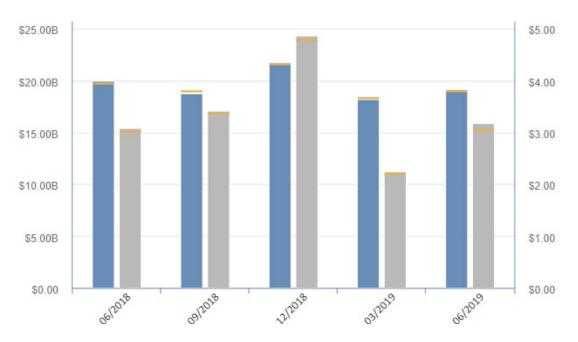

Profit - from 200% to 400% of the lot size.

The period of work of the idea
is from 5th of July to 2nd of August, 2019.

An investment Idea <u>"IBM shares will continue to decline. Get ready to make money on this with a ready-made investment idea from Ester!"</u> have not received an incentive and returned to decline despite all the expectations. A stronger report than expected has become the reason for the acceleration of growth in IBM shares.

The report showed earnings growth per share, but confirmed a slowdown in company earnings. As a result, this partially slowed down the downward trend in shares and pessimistic reporting.

IBM profitability chart (#IBM). Blue column - income, gray column - EPS, orange line - forecast

But this was enough for the growth of IBM shares and breaking the downtrend. As a result, this investment idea did not get a start to working out and closes, because the conditions for starting and changing the market picture were not met.
