An investment idea: "Technology giant Microsoft is getting ready to storm new highs! Let's make money on it!" continued to trade in the side channel, limited by the resistance level of 141.00-140.50. This indicates that the market is not ready to continue the growth of Microsoft shares.

Maintaining a restrained upward dynamics of these shares retains the potential for strengthening, but not within the framework of this investment idea. A slowdown in the annual uptrend and the persistence of uncertainty on the trading front is also a limiting factor.

As a result, the investment idea "Technology giant Microsoft is getting ready to storm new highs! Let's make money on it!" ceased to exist without receiving the proper signal to start.
